Title
Fine Grained twofactor access controlfoe web based cloud computing services
Conductive keyword search with designated tester and timing enabled proxy Re encryption function for E I
Characterizing and predicting early reviewing effective product
A DataMining based modelfor detectionof fraud marketing on E Commerce Websites
Predictionof crude oil process using SVR with Grid Search cross behaviour in water consumption
Detecting Mobile Malicious Webpages in Real Time Validating Algorithm
Secure Data sharing in cloud computing using revocable storage identify
Detecting Stress based on scocial interaction in socialnetworl based encyption
Big data Analytics Services Frameworkfor Advertising and Marketing
A Bio objective hyper neuristic support vector machine for big data
Driver drowsiness monitoring system using visual behaviour and machine learning
Semi supervised machinelearning approach for DDOS detection
Object Tracking using python
Credit card fraud analysis predictive modelling

Health clouds

Intelligent Data Transportation in Smart citie:A Spec

Semi supervised k means DDOS detection method us

Automatic number plate recognition for motor cyclist

Detection of covid-19 from chest X ray images using

Recommender system based on consumer product rev

Using data mining techniques to predict student perfo

Text & image plagiarism detection

Fast underwater image enhancement for improved vi

Credit card fraud detection using random forest algor

Online book recommendation system

Identify child attention through facial recognition usi

Crime prediction & analysis using ML

BAT: Deep learning methods onnetwork intrusion de

Predicting personality from twitter

Diabetics prediction using ML algoithm

Detection of fake online reviews usingh supervised &

Fall detection for elderly people using ML

Biometrically secured ATM vigilance system

Data security approach on cyber crime web vulnerabi

Deep hashing for secure multi model biometrics

Cyber threat detection based on artificial neural network
Image segmentation using Convolutional neural network
Prediction of hospital admission using ML
Heart disease prediction using ML algorithm
Detection of phishing websites using ML approach
Automatic keyword extraction for text summarization
Fraud prevention based on the self authentication of user
Crop yield prediction using ML algorithm
Automatic HTML code generation from mock up image
Classifications of pulmonary diseases using cough sound
Vehicle detection & speed & Estimation using cascaded
longitudinal study of 2 virtual cubes for people with normal
Movie recommendation system using Collaborative filtering
Filtering instagram hash tags through crowd tagging
Fake account detection using ML
A CAPTCHA recognition technology based on deep learning
A novel adaptive resource allocation model based on reinforcement
A machine learning framework for biometric authentication
A model for average fuel consumption in Heavy Vehicle
Comparative study for ML algorithm for fraud detection
Privacy preserving searchable encryption with the generalized
Hybrid Cryptography algorithm for secure file storage
Tourist place reviews sentiment classification using ML

Automated smart attendance system using face recog
A Comparative study of Supervised machine learning

Title
Fine Grained twofactor access controlfoe web based cloud computing services
Conductive keyword search with designated tester and timing enabled proxy Re encryption function for E I
Characterizing and predicting early reviewing effective product
A DataMining based modelfor detectionof fraud marketing on E Commerce Websites
Predictionof crude oil process using SVR with Grid Search cross behaviour in water consumption
Detecting Mobile Malicious Webpages in Real Time Validating Algorithm
Secure Data sharing in cloud computing using revocable storage identify
Detecting Stress based on scocial interaction in socialnetworl based encyption
Big data Analytics Services Frameworkfor Advertising and Marketing
A Bio objective hyper neuristic support vector machine for big data
Driver drowsiness monitoring system using visual behaviour and machine learning
Semi supervised machinelearning approach for DDOS detection
Object Tracking using python
Credit card fraud analysis predictive modelling
